BIOENGINEERING GROUP WINS TWO PRESTIGIOUS STEVIE® AWARDS AT 7TH ANNUAL STEVIE AWARDS FOR WOMEN IN BUSINESS

Salem, MA – November 22, 2010 – Bioengineering Group, a woman-owned science and engineering firm headquartered in Salem, MA, was honored by The Stevie Awards for Women in Business as a finalist in four categories and a winner in two categories:

- **Winner:** Women Helping Women Award
- **Winner:** Website of the Year
- **Finalist:** Environmental Stewardship Program of the Year
- **Finalist:** Best Entrepreneur – Service Business up to 100 Employees

The Stevie Awards for Women in Business is an international competition recognizing the accomplishments of outstanding women executives, entrepreneurs, and the organizations they run. The awards are produced by the creators of the prestigious American Business AwardsSM.

More than 1,200 entries from organizations of all sizes and in virtually every industry were submitted for consideration in 54 categories. The 2010 honorees reflect a diverse group of large and small organizations from around the world. Only seven organizations won more than one Stevie Award, which included Bioengineering Group. Nations represented in the winners' circle include Australia, Canada, Malaysia, Mexico, the Philippines, Sri Lanka, Turkey, the United Kingdom, and the U.S.A.

“We are delighted and honored to be recognized once again by The Stevie Awards for Women in Business,” stated Wendi Goldsmith, CEO of Bioengineering Group. “We are especially proud to be recognized for our efforts to encourage and support women to pursue careers in science, engineering,

-MORE-

technology, and entrepreneurship. I am glad that our website has also gained notice for its down-to-earth presentation of technologically complex subjects and especially its main theme—embracing sustainability to achieve savings while delivering social and environmental benefits.”

Bioengineering Group, a proponent of early adoption of sustainable technologies and well-known leader in ecologically sensitive development and public infrastructure work, applies a tailored interdisciplinary approach to solving engineering problems. Current projects include the provision of engineering, program management, and construction management services, through a Joint Venture with ARCADIS, for the largest design-build civil works project in U.S. history—the \$1.3 billion Inner Harbor Navigation Canal Surge Barrier that will provide hurricane and flood risk reduction for the city of New Orleans and enhancement of surrounding wetlands. The firm is also leading a significant program to accelerate adoption of renewable energy generation and ultra-low energy consuming facilities within the Department of Defense. Believing that every project offers the next opportunity to transact sustainability, Bioengineering Group provides design, environmental consulting, and sustainable site planning for private corporations, institutions, and local governments on small- to large-scale projects.

This award builds on other recent awards the firm has won, including the Environmental Business Journal’s highest level *2009 Business Achievement Award*; Boston Business Journal’s *Pacesetters Award* which recognizes the region’s fastest-growing private companies; the *ZweigWhite 2010 Hot Firms Award*; Inc. Magazine’s *Inc. 500/5000 Award* recognizing the nation’s fastest-growing private companies; *Top Ten Innovative Woman Entrepreneur* by Fortune Magazine for 2010; and *2010 Top 100 Women-Led Businesses in Massachusetts* by The Boston Business Journal and The Commonwealth Institute.

GROUP
Building Sustainable Communities
on an Ecological Foundation

About Bioengineering Group

Founded in 1992, Bioengineering Group has been a pioneer in the field of ecological restoration and the application of sustainability principles to site planning, development, renewable energy, and water management. The firm provides a full range of science, engineering, landscape architecture, and construction management services with a mission of “Building sustainable communities on an ecological foundation.” Distinguished by their interdisciplinary staff of ecologists, scientists, engineers, and landscape design professionals, Bioengineering Group is uniquely positioned to rigorously guide projects toward sustainable outcomes. The firm has worked with many municipalities, states, and government agencies to provide innovative site engineering and landscape architectural design; parks and greenways planning and design; integrated water management assessment and design; river and coastal

restoration and flood risk reduction; wind, biomass, solar, geothermal, and hydropower siting and development; as well as plan review, environmental permitting and remediation. Increasingly, the firm has been tapped to support projects which address renewable energy generation and creative solutions to achieve energy efficiency and security.
